1. Project Overview

DriveSchool Pro is a modern, full-stack driving school management platform built to serve all stakeholders of a driving school — prospective students, enrolled students, instructors, finance staff, examiners, branch administrators, and a platform-level super administrator. The system spans four distinct portals with role-based access control, real-time scheduling, M-Pesa and card payment integration, multi-branch support, and a comprehensive analytics suite.

Core Goals

- Digitise the full student journey from registration to certificate issuance
- Provide instructors with digital tools to manage schedules and log lesson progress
- Give finance staff full visibility of revenue, invoices, and payment reconciliation
- Enable branch admins to manage their location independently
- Give the super admin full platform control — users, branches, pricing, audit logs
- Deliver a consumer-grade UI that works on desktop and mobile

2. Technology Stack

Layer	Technology	Purpose
Frontend	React 18 + Vite	SPA framework, fast HMR builds
Routing	React Router v6	Client-side routing & protected routes
Styling	TailwindCSS + shadcn/ui	Utility-first CSS, accessible components
State	Zustand	Lightweight global state management
Data fetching	React Query (TanStack)	Server state, caching, optimistic updates
Backend	Node.js + Express	REST API server
ORM	Prisma	Type-safe database access
Database	PostgreSQL	Primary relational data store
Auth	JWT + Refresh Tokens	Stateless auth with role claims
Payments	M-Pesa Daraja API + Stripe	Mobile money and card processing
File storage	Cloudinary	Certificates, documents, images
Notifications	Africa's Talking + Nodemailer	SMS alerts and email notifications

PDF generation	Puppeteer / PDFKit	Invoices, certificates
Testing	Vitest + Supertest	Unit and integration tests
DevOps	Docker + GitHub Actions	Containerisation and CI/CD
Hosting	Railway / Render + Vercel	Backend and frontend deployment

3. User Roles & Access Control

The platform implements a strict role-based access control (RBAC) model. Every API route is protected by JWT middleware that validates the user's role claim before granting access. The hierarchy is: Super Admin > Branch Admin > Finance > Examiner > Instructor > Student.

Super Admin	Full platform control — all branches, all users, system config, audit logs, pricing, certificate templates.
Branch Admin	Manages one branch — students, staff accounts, schedules, fleet, branch-level reports.
Instructor	Views own schedule, logs lesson notes, marks lesson complete, updates student progress.
Finance	Manages payments, generates invoices/receipts, views financial reports, records cash payments.
Examiner	Records mock test results, marks students as exam-ready, views assigned student profiles.
Student	Books lessons, views progress, pays fees, takes theory quizzes, downloads certificates.

4. Portal 1 — Public Website

The public-facing marketing site. No login required. Optimised for SEO and conversion.

Page	Key Sections / Components
Home (Hero)	Headline, CTA buttons (Enrol Now / Book Trial), trust badges, stats counter
About	School story, mission, team photos, accreditation logos
Courses	Course cards per vehicle type, lesson count, duration, price, enrol button

Pricing	Comparison table: Basic / Standard / Premium packages, M-Pesa badge
Instructors	Instructor grid cards with photo, bio, rating stars, specialisation
Branches	Map embed, branch address cards, opening hours, contact details
Theory Hub	Free sample theory questions — teaser to drive registration
Contact	Contact form, WhatsApp chat button, embedded Google Map
Register / Login	Student registration form, login form, forgot-password flow

5. Portal 2 — Student Portal

The student portal is a protected SPA accessible after login. It provides the student with full visibility of their learning journey, booking tools, payment history, quiz module, and certificate downloads. The portal is fully responsive for mobile use.

Screen	Description
Dashboard	Welcome banner, next lesson card, progress ring, quick actions
My Progress	Visual roadmap: lessons completed, hours logged, theory score, exam read
Book a Lesson	Calendar picker, instructor filter, slot selector, confirmation + SMS receipt
My Schedule	Upcoming and past lessons list, reschedule / cancel controls (with policy not
Payments & Invoices	Balance due, payment history table, Pay via M-Pesa / Card CTA, PDF invoic
Theory Tests	Quiz library by vehicle type, timed mock tests, score history, pass/fail badge
My Instructor	Assigned instructor profile, ratings I've given, message button
Documents	Download completion certificate (QR-verified), upload required docs (ID, pas
Notifications	In-app notification feed + email/SMS preferences toggle
Profile & Settings	Personal info, change password, profile photo, branch selection

6. Portal 3 — Staff Portal

The staff portal is role-gated. After login, each staff member sees only the modules their role permits. The sidebar navigation adapts dynamically to the authenticated role.

6.1 Branch Admin

Module	Functionality
Admin Dashboard	KPI cards: active students, lessons today, revenue this month, vehicles on r
Student Management	Student list, search/filter, view profile, enrol, suspend, transfer between bran
Staff Management	Add/edit/deactivate instructor, finance, examiner accounts; assign to branch
Schedule & Calendar	Full calendar view of all lessons; drag-to-reschedule; assign instructor to slo
Fleet Management	Vehicle list (reg, type, status), assign to lesson, log service/maintenance
Course & Package Config	Edit course content, lesson count, price per package, activate/deactivate pa
Branch Reports	Enrolment trends, revenue charts, instructor utilisation, student pass rates
Announcements	Broadcast SMS/email to all students or filtered groups

6.2 Instructor

Module	Functionality
My Dashboard	Today's lessons timeline, student count, hours this week
My Schedule	Weekly calendar, lesson detail drawer, mark lesson complete
Student Progress	List of assigned students, per-student progress log, add lesson notes
Availability	Set available time slots per day; block holiday/leave dates
My Ratings	Star rating history per student, average score, comments feed
Vehicle Request	Request a specific vehicle for a lesson date

6.3 Finance Officer

Module	Functionality
--------	---------------

Finance Dashboard	Total revenue, collected today, outstanding balances, M-Pesa vs card split chart
Payments	All payment records, filter by student/date/method, mark cash payment as received
Invoices	Generate and send invoice to student, bulk invoice export
Receipts	Auto-generated PDF receipts, resend to student via email/SMS
Expense Tracking	Log operational expenses (fuel, maintenance, utilities)
Financial Reports	Monthly P&L summary, export to CSV/PDF
Refund Management	Process refund request, log reason, update student balance

6.4 Examiner

Module	Functionality
Examiner Dashboard	Students pending assessment, scheduled mock tests today
Student Assessments	View assigned students, record mock test score, add evaluator comments
Exam Readiness	Mark student as ready / not ready for official test
Test History	Full history of assessments per student

7. Portal 4 — Super Admin Panel

The super admin panel is completely separate from the staff portal — different subdomain or route prefix (e.g. /superadmin). It provides god-mode control over the entire platform across all branches.

Module	Functionality
Platform Dashboard	Live stats: total students all branches, revenue all branches, active lesson
Branch Management	Create/edit/archive branches, assign branch admin, set branch-level confi
User Management	Search any user platform-wide, reset password, change role, ban/unban
Course & Pricing Control	Set global course templates, override branch pricing, publish/unpublish pa
Payment Gateway Config	M-Pesa Daraja API keys, Stripe keys, webhook endpoints, test mode togg
Certificate Template Editor	Upload/design certificate layout, set QR code fields, preview before publis
Notification Templates	Edit SMS and email templates for all system events

Theory Test Builder	Create/edit quiz questions per vehicle type and category, set pass mark
Audit Logs	Full immutable log of every create/update/delete action with user + timestamp
System Health	API uptime, DB connection status, queue depth, error rate charts
Announcement Broadcast	Push a message to all users platform-wide or filter by role/branch
Reports & Analytics	Cross-branch revenue comparison, funnel analysis, instructor performance ranking

8. Feature Specifications

Smart Booking Engine

- Students self-book: pick course → pick instructor → pick date/slot
- Admins/instructors can assign students to slots directly
- Conflict detection prevents double-booking of instructor and vehicle
- Cancellation policy enforced: free cancel 24h+, fee within 24h
- Automatic SMS reminder 24h and 1h before lesson
- Waitlist support when all slots are full

Student Progress Tracker

- Visual roadmap showing: lessons booked, lessons completed, hours logged
- Theory quiz scores with pass/fail threshold per vehicle type
- Examiner readiness assessment result
- Percentage-to-completion progress ring on dashboard
- Instructor lesson notes visible to student after each session

Theory Quiz Module

- Question bank organised by vehicle type (Car, Motorcycle, HGV)
- Timed mock tests (30 questions, 45-minute limit)
- Instant result with correct answers and explanations
- Score history chart across attempts
- Super admin manages question bank via CMS-style interface

Digital Certificate Issuance

- Auto-generated on course completion (all lessons done + exam passed)
- PDF with unique certificate number and QR code
- QR code links to public verification page (no login required)
- Super admin controls certificate template design
- Downloadable from student portal and emailed automatically

Fleet Management

- Vehicle registry: registration plate, type, year, status
- Assign vehicle to lesson slot; conflicts prevented
- Service/maintenance log per vehicle with date and cost
- Mileage tracker per vehicle
- Admin alert when vehicle is due for service

Instructor Rating System

- After each completed lesson, student receives a rating prompt
- 1–5 star rating with optional text comment
- Ratings averaged and displayed on instructor profile
- Admin can view all ratings; flag/moderate inappropriate comments
- Instructor performance ranking visible to super admin

9. Database Schema Overview

Table	Key Fields
users	id, email, password_hash, role, branch_id, status, created_at
students	id, user_id, course_id, enrolled_at, progress_pct, exam_ready
instructors	id, user_id, branch_id, vehicle_types[], rating_avg, available_slots
courses	id, name, vehicle_type, lesson_count, duration_hrs, price, branch_id
lessons	id, student_id, instructor_id, vehicle_id, scheduled_at, status, notes
payments	id, student_id, amount, method (mpesa card cash), status, ref, created_at
invoices	id, payment_id, pdf_url, sent_at
vehicles	id, branch_id, plate, type, year, status, last_service_at
quiz_questions	id, vehicle_type, category, question, options[], correct_index, explanation
quiz_attempts	id, student_id, score, passed, answers[], taken_at
certificates	id, student_id, cert_number, qr_code_url, issued_at, pdf_url
ratings	id, student_id, instructor_id, lesson_id, stars, comment, created_at
branches	id, name, address, lat, lng, admin_id, phone, status

notifications	id, user_id, type, title, body, read, created_at
audit_logs	id, user_id, action, entity, entity_id, diff_json, ip, created_at

10. API Architecture

Base URL: <https://api.driveschoolpro.com/v1>

Prefix	Resource	Auth Required
/auth	Login, register, refresh token, forgot/reset password	Public
/students	Student CRUD, progress, documents	Student / Admin
/instructors	Instructor CRUD, availability, ratings	Instructor / Admin
/lessons	Book, reschedule, cancel, complete	All roles
/payments	Initiate, verify, history, refund	Student / Finance
/invoices	Generate, fetch, send	Finance / Admin
/courses	CRUD courses and packages	Admin / Super Admin
/vehicles	Fleet CRUD, assign, service log	Admin
/quiz	Fetch questions, submit attempt, history	Student / Super Admin
/certificates	Issue, download, verify (public endpoint)	Student / Admin
/branches	CRUD branches	Super Admin
/users	Platform-wide user search and management	Super Admin
/notifications	Fetch, mark read, preferences	All roles
/audit	Fetch audit logs	Super Admin
/reports	Revenue, progress, performance reports	Admin / Finance / Super A

11. Payment Integration

M-Pesa (Daraja API — STK Push)

- Student enters phone number → STK Push prompt sent to phone

- Webhook receives callback → payment confirmed and recorded
- Receipt generated and sent via SMS automatically
- Sandbox/live toggle controlled by super admin

Card Payments (Stripe)

- Stripe Checkout or Elements embedded in payment screen
- Webhook handles payment_intent.succeeded event
- 3D Secure supported for issuer compliance
- Invoice PDF emailed on successful charge

Manual/Cash (Finance Staff)

- Finance officer records cash payment with amount, date, and note
- Receipt generated and can be printed or emailed
- Reconciliation report shows cash vs digital split

12. Notifications & Messaging

Event	Channel	Recipient
Lesson booked	SMS + Email	Student
Lesson reminder (24h)	SMS	Student + Instructor
Lesson reminder (1h)	SMS	Student
Lesson completed	In-app	Student
Payment received	SMS + Email	Student
Payment overdue	SMS + Email	Student
Quiz passed	In-app + Email	Student
Certificate issued	Email	Student
Lesson cancelled	SMS + In-app	Student + Instructor
New student enrolled	Email	Branch Admin
Vehicle service due	In-app	Branch Admin
Platform broadcast	SMS + Email	Filtered group

13. Non-Functional Requirements

Performance

- API response time < 300ms for 95th percentile
- Page load < 2s on 4G mobile
- Lazy loading for all image assets

Security

- All passwords bcrypt-hashed (salt rounds 12)
- JWT expiry 15 min + refresh token rotation
- Rate limiting on auth endpoints (5 req/min)
- SQL injection prevention via Prisma parameterised queries
- HTTPS enforced everywhere

Scalability

- Stateless API — horizontal scaling ready
- Database connection pooling via PgBouncer
- Background jobs (reminders, PDF gen) via Bull queue

Reliability

- 99.5% uptime SLA
- Automated daily database backups
- Graceful error handling with user-friendly messages

Accessibility

- WCAG 2.1 AA compliance on public website
- Keyboard-navigable admin panels
- Screen reader labels on all form inputs

Internationalisation

- All text via i18n strings (English first, Swahili-ready)
- Currency display in KES with correct formatting

14. Suggested Modern Features

Feature	Value Proposition
WhatsApp chatbot integration	Students can check their next lesson, pay fees, or get theory tips via Wh
AI lesson recommendation	Suggest optimal lesson frequency based on student progress speed and
Referral programme	Students earn a discount voucher for each friend they refer who enrolls
Instructor live-tracking	Optional GPS share during lesson — parent/guardian can view car locat
Progressive Web App (PWA)	Student portal installable on Android/iOS home screen, offline theory qui
Video theory library	Short how-to videos (road signs, manoeuvres) embedded in the theory h
Dark mode	System-preference-aware dark theme across all portals
Student leaderboard	Gamified quiz scoreboard per branch — drives theory test engagement
Automated pass/fail prediction	ML-style score based on lessons attended, quiz average, and time since
Integrated Google Reviews widget	Pull live Google rating onto the public homepage automatically

15. Figma UI Design Prompt

Paste the full block below into Figma AI, Figma's design plugin, or share with your UI designer as a comprehensive brief. It covers visual language, component inventory, and all key screens.

FIGMA DESIGN PROMPT – DRIVESCHOOL PRO PLATFORM

===== PROJECT OVERVIEW You are designing a complete UI system for "DriveSchool Pro", a modern driving school management platform. The system has four portals: a public marketing website, a student portal, a staff/admin portal, and a super admin panel. Design for desktop-first with full mobile responsiveness. VISUAL LANGUAGE & DESIGN SYSTEM Design style: Modern SaaS dashboard – clean, confident, professional. Think Linear, Notion, or Vercel meets a consumer app. Color palette: Primary: #1A1A2E (deep navy – brand authority) Accent: #E94560 (coral-red – CTAs, alerts, highlights) Accent-2: #0F3460 (mid-blue – links, secondary actions) Success: #10B981 (green – completed, paid, passed) Warning: #F59E0B (amber – pending, reminders) Info: #3B82F6 (blue – informational states) Purple: #8B5CF6 (examiner role, quiz module) Neutral-50: #F8FAFC Neutral-100: #F1F5F9 Neutral-200: #E2E8F0 Neutral-500: #64748B Neutral-900: #0F172A Typography: Font family: Inter (primary), JetBrains Mono (code/IDs only) Heading 1: 32px / 700 / -0.5px tracking Heading 2: 24px / 600 Heading 3: 18px / 600 Body: 16px / 400 / 1.6 line-height Small: 14px / 400 Label: 12px / 500 / 0.5px tracking / uppercase Spacing system: 4px base unit (4, 8, 12, 16, 24, 32, 48, 64, 96) Border radius: 4px (inputs), 8px (cards), 12px (modals), 16px (large cards), 9999px (pills/badges) Shadows: Subtle – box-shadow: 0 1px 3px rgba(0,0,0,0.08), 0 1px 2px rgba(0,0,0,0.04) No gradients on backgrounds. Flat color surfaces only. COMPONENT LIBRARY (design as reusable components) Core: Button (primary/secondary/ghost/danger, sm/md/lg), Input, Textarea, Select, Checkbox, Radio, Toggle, Date picker, File upload Feedback: Toast notification, Alert banner, Empty state illustration, Loading skeleton, Progress bar, Progress ring Navigation: Sidebar (collapsible), Top navbar, Breadcrumb, Tabs, Pagination, Stepper Data display: Table with sort/filter, KPI card, Stat card, Badge/pill, Avatar, Rating stars, Timeline Overlays: Modal, Drawer (right slide-in), Tooltip, Dropdown menu, Confirmation dialog Forms: Multi-step form with progress indicator, Form section with label + helper text + error state SCREEN DESIGNS REQUIRED --- PUBLIC WEBSITE --- 1. HOMEPAGE (desktop + mobile) Hero: Full-width section. Left: headline "Learn to Drive with Confidence", sub "Kenya's most trusted driving school. Cars, Motorcycles, HGVs.", two CTAs (Enrol Now – accent red filled, Book Free Trial – outlined). Right: hero image placeholder (instructor and student at car). Below hero: 4 trust stat cards (500+ Students, 15 Instructors, 3 Branches, 98% Pass Rate). Section: "Our Courses" – 3 course cards in a row (Car, Motorcycle, HGV) with icon, description, price from, "View Course" link. Section: "How it Works" – 4-step horizontal timeline (Register → Pay → Book → Drive). Section: Instructor spotlight – 3 instructor cards with avatar, name, rating stars, specialisation chip. Section: Testimonials – 2-column quote cards. Footer: logo, nav links, social icons, copyright. 2. COURSE DETAIL PAGE Breadcrumb. Left col: course title, vehicle type chip, description, lesson breakdown list (with check icons), what's included. Right col: sticky pricing card – price, duration, package selector (Basic/Standard/Premium), Enrol Now CTA, payment badge row (M-Pesa + Visa + Mastercard icons). 3. REGISTER PAGE Centered card. Step 1: Personal info (First name, Last name, Email, Phone, Password, Confirm password, Date of birth, National ID). Step 2: Course selection (vehicle type radio cards). Step 3: Branch selection (branch cards with map

pin + address). Submit → success state. --- STUDENT PORTAL ---

4. STUDENT DASHBOARD

Sidebar: logo, nav items with icons (Dashboard, My Lessons, Book a Lesson, Payments, Theory Tests, Documents, Notifications, Settings). Active state: accent background pill. Top bar: branch selector dropdown, notification bell with badge, avatar menu. Main content: Welcome heading "Good morning, [Name]". Row of 4 KPI cards: Next Lesson (date + instructor name), Lessons Completed (X of Y), Theory Score (X%), Balance Due (KES XXXX). Below: two-column layout. Left: "My Progress" – circular progress ring (large, 65% fill example), below it a checklist (Enrolled, Lessons booked, Theory passed, Exam ready). Right: "Upcoming Lessons" – list of 3 lesson cards each with date, time, instructor avatar + name, vehicle type chip, status badge (Confirmed/Pending).

5. BOOK A LESSON SCREEN

Step 1: Course/vehicle type selector cards (3 cards: Car, Motorcycle, HGV – selected state has accent border + checkmark). Step 2: Instructor selector – horizontal scrollable row of instructor cards (avatar, name, rating, "X slots available" tag). Selected = accent border. Step 3: Calendar – full month calendar view. Available dates = teal dots. Unavailable = muted. Selected = accent filled circle. Below calendar: time slot grid (morning / afternoon / evening sections, each slot is a pill – available/selected/taken states). Step 4: Confirmation screen – summary card (instructor, date, time, vehicle, price), Pay Now CTA.

6. PAYMENTS SCREEN

Balance card at top (KES XXXX outstanding – accent red background). Below: two CTAs side by side (Pay via M-Pesa, Pay via Card). Payment history table: Date, Description, Amount, Method chip (green M-Pesa / blue Card / orange Cash), Status chip (Paid/Pending/Failed), Download receipt icon.

7. THEORY TEST SCREEN

Left: quiz categories list (Highway Code, Road Signs, Vehicle Safety – each with icon and question count). Right: active quiz card – question number/total, question text, 4 answer option buttons (A/B/C/D), timer countdown top-right, Next button. Result state: score percentage large, pass badge or retry prompt, correct answers revealed inline. --- STAFF PORTAL ---

8. BRANCH ADMIN DASHBOARD

Sidebar with role label "Branch Admin" at bottom. KPI row: 4 cards (Active Students, Lessons Today, Revenue This Month, Vehicles Available). Below: two-column. Left: "Today's Schedule" – vertical timeline of lessons with instructor avatar, student name, time, vehicle. Right: "Recent Payments" – compact table (student, amount, method, time). Below: "Instructor Utilisation" – horizontal bar chart (each bar is one instructor, filled to % of available hours used today).

9. STUDENT MANAGEMENT TABLE

Search bar + filter chips (All / Active / Pending / Suspended) + "Add Student" button top right. Table: Avatar + Name, Course, Branch, Enrolled Date, Progress bar (%), Balance, Status badge, Actions (View, Edit, Message). Row hover state. Clickable row opens right drawer.

10. LESSON CALENDAR (ADMIN VIEW)

Full calendar (month/week/day toggle). Lesson events as colored blocks by instructor color. Click event → popover with: student name, instructor, vehicle, time, status, action buttons (Edit, Cancel). Week view shows time slots as rows.

11. FLEET MANAGEMENT

Vehicle cards grid (4 per row). Each card: vehicle photo placeholder, registration plate (large, monospace font), vehicle type chip, status badge (Available / In Lesson / In Service), assigned instructor name if in lesson, action button. "Add Vehicle" card at end of grid (dashed border, plus icon).

--- SUPER ADMIN PANEL ---

12. SUPER ADMIN DASHBOARD

Wider sidebar – includes "Platform Settings" section. Top KPI row (6 cards): Total Students (all branches), Total Revenue MTD, Active Lessons Now, Registered Instructors, Branches Online, Certificates Issued. Main area: left – line chart (revenue per branch, last 12 months, multi-line). Right – branch performance table (Branch name, Students, Revenue, Pass Rate, Status). Below: recent audit log feed (icon + action description + user + timestamp).

13. USER MANAGEMENT

Full-width table with global search. Columns: Avatar + Name, Email, Role chip (color-coded), Branch, Status toggle, Last Active, Actions (Edit role, Reset password, Ban). Filter bar: Role, Branch, Status. Bulk select + bulk action

dropdown. 14. AUDIT LOG VIEWER Timeline layout – each entry: colored icon (Create=green, Update=amber, Delete=red), action description, entity type badge, user name + role, IP address, timestamp. Filter by: action type, user, date range. Monospace font for diff details (expandable). MOBILE SCREENS (design 3 key screens at 390px width) M1: Student Dashboard – bottom tab bar replaces sidebar (5 tabs: Home, Lessons, Book, Pay, More). KPI cards stack vertically. Progress ring full width. M2: Book a Lesson – full-screen step wizard, bottom-anchored CTA button, horizontal scroll for instructor cards. M3: Payment – M-Pesa flow – phone input screen → "Check your phone" waiting state with spinner → success state with receipt card. STATES TO DESIGN Every interactive component needs: Default, Hover, Focus, Active, Disabled, Loading (skeleton), Error, Empty. ASSETS TO INCLUDE IN HANDOFF Icon set: Lucide Icons (outlined, 24px grid) Illustration style: Simple line illustrations (Storyset or unDraw style) – one per empty state Color tokens: Named in design system (e.g. color-accent-primary, color-success-subtle) Spacing tokens: Named (spacing-4, spacing-8, etc.) Component variants: All buttons, inputs, badges in one component frame OUTPUT FORMAT Deliver as a Figma file with: Page 1: Design System (colors, typography, spacing, components) Page 2: Public Website Page 3: Student Portal Page 4: Staff Portal Page 5: Super Admin Panel Page 6: Mobile Screens Each screen at 1440px desktop width, 390px mobile width.

How to use this prompt: Copy the block above and paste it into Figma AI (via the Figma plugin panel), share it with your UI designer as a brief, or use it with any AI design tool (Galileo, Uizard, Visily) to generate initial wireframes. The prompt specifies every screen, component, color token, and state needed for a complete handoff.
